↵Index

Table of Contents

The Proxmox VE management tool (`pvesh`) allows to directly invoke API function, without using the REST/HTTPS server.

> **note**
> Only *root* is allowed to do that.

EXAMPLES

Get the list of nodes in my cluster

```
# pvesh get /nodes
```

Get a list of available options for the datacenter

```
# pvesh usage cluster/options -v
```

Set the HTMl5 NoVNC console as the default console for the datacenter

```
# pvesh set cluster/options -
console html5
```
